Choose who you will buy from, what plan best meets your needs and how long your contract term will be!

Why Choose an Energy Provider Through ACN?

Freedom of Choice: Through the deregulation of energy markets you now have the power to choose your energy supplier

More Options: Wide variety of plans and pricing options not available through your local utility

Same Reliable Service: No change in the delivery or maintenance of your natural gas or electricity service

Eligibility Requirements:

Small and Big Business eligibility is determined by annual* energy consumption. The easiest way to determine your energy consumption is to look at your previous and current month's natural gas or electricity bills.

Small Business Criteria (Natural Gas & Electricity):

- If your business uses less than \$25,000 in commodity consumption annually, you are considered a Small Business customer.
- Small business customers should order directly at the XOOM online portal via your ACN Direct Online Store.

Big Business Criteria (Natural Gas & Electricity):

- If your business uses between \$25,000 and \$500,000 in commodity consumption annually, you may qualify for a custom rate proposal through the XOOM Energy Big Business Program.
- IBOs should use the Big Business Program forms to submit a customer lead. Find these forms in your IBO Back Office or on the XOOM Energy online portal

When you sign up for XOOM Energy, a child gets fed.

*Energy deregulation has not occurred in all U.S. states. Energy service for businesses is only available in select markets. Programs vary by state. ACN markets energy services provided by XOOM Energy. ACN does not provide the actual service for your natural gas and/or electricity.
